Main Features

- Vlog mode:One SmartMike+ works with smart phone via Bluetooth.
- TWS mode：Two SmartMike+s paired with one smart phone via Bluetooth simultaneously.
- MS (Master/Slave) Mode：Two SmartMike+s paired internally via Bluetooth. One is master as a wireless receiver and the other is slave as a Bluetooth microphone.
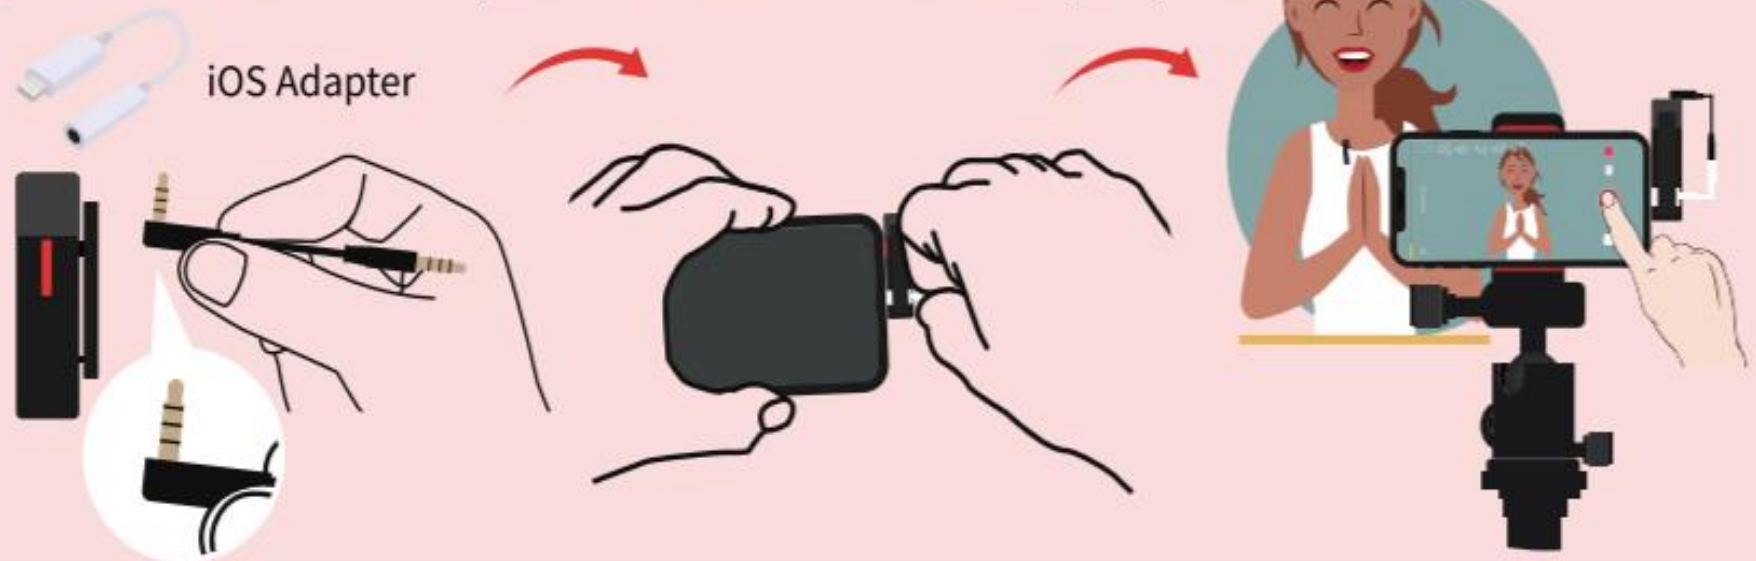

① Vlog mode：One SmartMike+ works with your phone via Bluetooth.
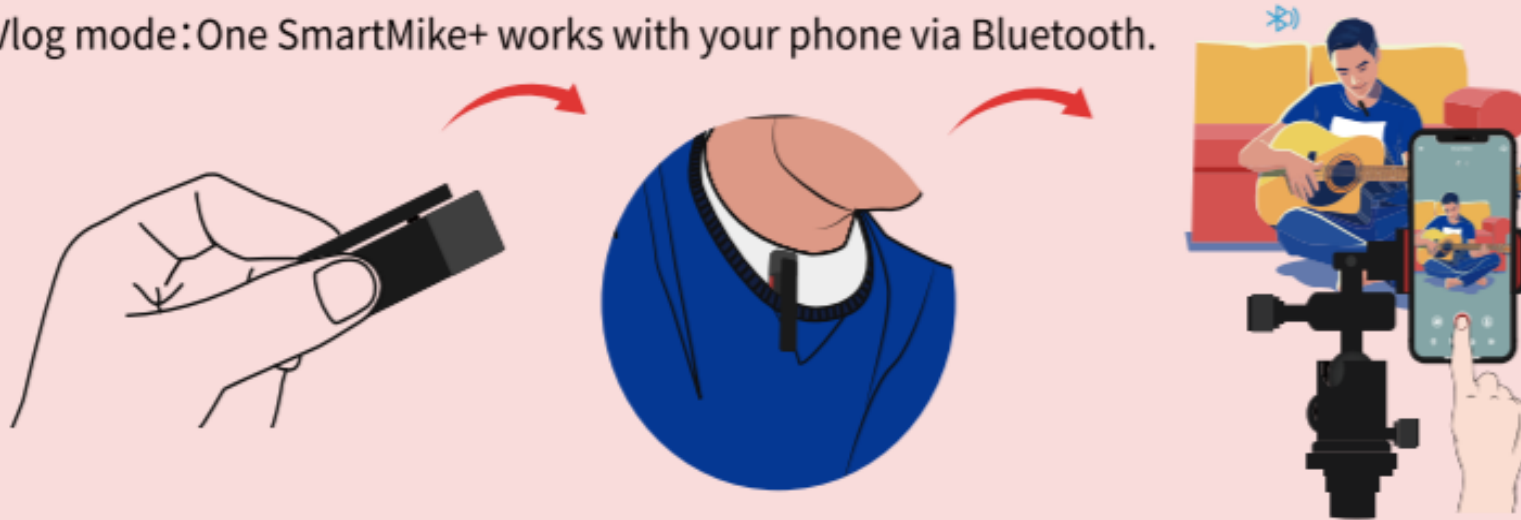

② TWS mode：Two SmartMike+s work with your phone via Bluetooth simultaneously.

3 MS mode 1: Use 3.5 mm 4 poles TRRS cable to connect with your phone.

iOS Adapter

4 MS mode 2: Use 3.5 mm 3 poles TRS cable to connect with your camera or GoPro

⑤ MS mode 3: Use 3.5 mm 3 poles TRS cable to connect with your PA or sound card

Pair any two SmartMike+s in M/S mode:

1. Long press the RED button on SmartMike+ A to power on and hold for 10s to enter master pairing mode. The LED will be blinking in Red andGreen.
2. Long press the RED button on SmartMike+ B to power on and hold for 3s to enter slave paring mode. The LED will be blinking in Blue.
3. SmartMike+ A will then search SmartMike+ B and connect automatically.Once paired successfully, the LEDs on SmartMike+ A will be shining inGreen and SmartMike+ B in Blue.
4. Plug either of the two SmartMike+s under the M/S mode into mobile phone, DSLR, PC or any device with Aux-input interface via a 3.5mm jack as a receiver and the other as a wireless microphone close to sound source.

Tip：Before paring the 2 devices, please make sure that neither device is connected to the phone.
